

Theme Screens - Den & Stage Kit

LEARNING WITH
Linden

Convert Theme Screens into a Den or Stage

Within 5 minutes the Theme Screen Frames can be converted into a magical hideaway environment, dramatically increasing the scope of this product. With the Den kit in place, the Theme Screens can still provide a backdrop for role play but they can now also be used as:

- A reading Corner
- A reading Den
- A Dark Den

- A theatre stage
- A stimulus area for Creative Writing
- A reward scheme space

The outer cover completely cuts out the light when inside, but with the addition of 9m of rope lighting, children can read inside as well as see the changeable banner images clearly. The inner lining of the roof resembles a starry sky adding to the atmosphere.

Mirror & Whiteboard Insert Panels

More uses for the Theme Screens

As the frames have a mesh core they are ideal for hanging things on, or using as a threading frame. In addition, there are now colourful and lightweight mirror and whiteboard panels, that can clip onto the mesh. The whiteboard is magnetic and the mirror helps children to see themselves within a scene, as shown. Both can remain on the frames, behind a banner, when not needed. Sized : 960 x 810mm. Fit on both standard and mini theme screen frames.
